On the Correlation Between the A.I.M. & George Jackson's
On Withdrawal

Autonomous Infrastructure Mission
A.I.M.
On the Correlation Between the A.I.M. & the Honorable George Jackson’s "On Withdrawal" and the Honorable Joka Heshima Jinsei.
Legal slavery in Amerika is grounded in the foundation of poverty, inequality, economic desperation, racial hatred, educational underdevelopment. These social ills breed the community instability which gives rise to the criminalization of our people, upon which the prison-industrial slave complex (PISC) is based.

The primary aim of Amend The 13th is not legislative. The slave provision of the 13th Amendment could be stricken tomorrow. But if the institutions, which have preserved legal slavery in Amerika continue to be the primary basis of the infrastructure in our communities, the social ills they inevitably produce will continue to perpetuate defacto ‘legal’ dehumanization and exploitation.

If we are to eliminate the basis of legal slavery in Amerika, we must develop our own Autonomous Infrastructure, capable of diminishing the criminalization, which fuels imprisonment – an infrastructure built for us, of us and by us. To that end, the Amend The 13th Autonomous Infrastructure Mission (AIM) is the backbone of our movement to abolish legal slavery in Amerika.

The origin of crime is the disproportionate distributions of wealth, access and opportunity in society. If the origin of legal slavery is criminalization, and the origin of criminalization is disorganizing poverty-stricken communities, the solution is to eradicate the poverty and disorganization of our communities through our own autonomous infrastructure. One capable of meeting our basic needs, while increasing the wealth and prosperity in our communities.

The Amend The 13th Autonomous Infrastructure Mission – or A13 AIM – will provide each community with a functional blueprint and structure to forge our own social, economic, educational, agricultural, political, self-defense and emergency response infrastructure, which are independent of the state and wholly self-reliant.
the U.S. and the purpose of the AIM, it is my hope to clarify the AIM’s potential and why it is so vital to the cause of New Afrikan National Liberation Revolution and to all of humanity.

The U.S. is the most advanced fascist state in the history of human civilization. In 2021 it has succeeded in convincing New Afrikans in Amerika - descendants of over 4 centuries of chattel slavery - to actively participate in their own oppression, social containment and extermination. It has indoctrinated the vast majority of its workers to identify its social, political and economic interests with the same elites who have so thoroughly exploited them, that they’ve managed to concentrate 99% of the nation’s wealth into the hands of a scant 2% of the population, while they struggle to feed their children and pay off their ever expanding debt. It has strode the world stage declaring itself the bastion of freedom, justice and equality while preserving the most lethal racism, overt injustice and glaring inequality as the very function of its every institution.

Reactive nationalism, hate based scapegoating and violent repression are redefined and hailed as the noble values of patriotism, defense of the homeland and ‘national security’. In contrast, pursuit of genuine Freedom, Justice and Equality is recast as dangerous anti-Americanism, potential-terrorist militancy and threats of usurpation.

The nature and structure of modern U.S. society precludes the very possibility of true Freedom for New Afrikans and other nationally oppressed People. We live without justice because the very function of U.S. “Law & Order” policy is NOT to achieve that end, but instead to ensure the social containment and orderly disposal of its oppressed. We live without justice because the very function of U.S. economic and racial caste systems is to ensure the hierarchy and hegemony of patriarchal authoritarian white male privilege and the ongoing extraction of super profits for the Capitalist class.

This can not be stated enough. When the inevitable fascist reaction to this withdrawal finds these institutions under attack once again, unlike in the past, we will have a base from which to operate and resist. These struggles to grow and evolve these institutions under attack will of necessity create new Men and Women, more progressive modes of thought and behavior. The struggle to resist and defend our autonomous infrastructure will redefine our lives in new social and political action to further expose and isolate these institutions under attack. When we can not control the outcome of these struggles, they will transform us. When we can control the outcome of these struggles, they will transform the world.

In the final analysis, the AIM is the modern evolution of the Black Commune model envisioned by Komrade George’s analysis “On Withdrawal” and is as essential today to Our quest for a better future as it was in 1970. As Komrade George observed: “Without the collective sense of Community, without its movement in the final analysis, the AIM is the modern evolution of the autonomous infrastructure as food. However, make no mistake, organized self-defense is as necessary to this contradiction, that has a purpose, to another time.

The AIM grows, the fascist arrangement will weaken in direct proportion. Remember, the primary productive point of the capitalist system is the People themselves. Like a machine reliant on a specific electrical current to operate, as that current is diverted to power another machine, its function will be increasingly compromised until it ceases to function at all. As the AIM grows, the fascist arrangement will weaken in direct proportion. Remember, the primary productive point of the capitalist system is the People themselves. Like a machine reliant on a specific electrical current to operate, as that current is diverted to power another machine, its function will be increasingly compromised until it ceases to function at all.
The primary mechanism employed by U.S. fascist institutions to perpetuate themselves, with little to no opposition (and neutralize any opposition if it does arise), is REFORM.

In his groundbreaking analysis, “On Withdrawal”, the Honorable Komrade George L. Jackson observed:

“Corporative ideals have reached their logical conclusion in the U.S.. The new corporate state has fought its way through crisis after crisis and established it’s ruling elites in every important institution, formed it’s partnership with labor through it’s elites, erected the most massive network of protective agencies replete with spies, technical and animal, to be found in any police state in the world. The violence of the ruling class in this country in the long process of it’s trend towards authoritarianism and its last and highest state, fascism, can not be rivaled in its excesses by any other nation on Earth today or in history... Fascism has temporarily succeeded under the guise of reform.”

When we speak of fascism most will envision Italy under Mussolini, Spain under Franco or Germany under Hitler, and declare this is fascism. They will look to these primitive models of the system, then look at Amerika and say they can’t possibly be living in a fascist state. To them I say the U.S. has more of its citizens interned in prisons, more people locked behind walls, barbed wire and gun towers than ANY OTHER NATION ON EARTH. The U.S. has more People in prison than China, Russia, North Korea and Iran COMBINED. Fascism in the U.S. is light years more advanced than anything Hitler or any of these primitive fascists could have begun to imagine.

Fascism, like any other ideology- is a LIVING thing, constantly growing, evolving and disguising itself. This process of growth, evolution and disguise is known as REFORM. Across the U.S. many who claim to be the rebels and progressives of the day are actually clamoring for reform.
Be it economic reform, police reform, election reform or educational reform - it is simply a reformation of the oppressive relationships the People are screaming to be free of.

Let me illustrate with an analogy (tw/cw mention of rape): A rapeist is violating his victim who screams for him to stop. However, instead of stopping he just applies a little lube to make the rape a little more comfortable for the victim, and continues to violate them. They're still being raped, it's just been "reformed" with a little lube.

The unfortunate reality is so many of Our People have been conditioned against collective work and responsibility, against New Afrikan National identity, against Unity and against rational resistance that they will accept - even fight for - reform (thus effectively neutralizing any Revolutionary potential) rather than oppose the fascist arrangement.

So then, what must we do? What steps must be taken if we are to ever realize genuine Freedom, Justice and Equality for Our People? If the very nature and structure of U.S. institutions is to ensure these principles are forever out of Our reach, then any social act we take which moves us closer to realizing them, by definition, must be Revolutionary. It will change social conditions, and as such, change the People and the world we live in.

The implementation of this new social, political, and economic program will feed and comfort all the People on at least a subsistence level, and force the "owners" if the enemy bourgeois economic infrastructure to either make the commute and the culture either to their world a justification to the community and the enemy bourgeois economic infrastructure, capable of fulfilling the vacuum that has been left by the equalitarian rural class and punishing the People or to leave the land, the tools and the market behind...

The next logical question is how we will achieve the enemy state. The purpose of the Autonomous Infrastructure Mission is to forge our own food systems and proto-agricultural institutions through the Sustainable Agricultural Commune (SAC); to build our own jobs and businesses through the Closed-Circuit Economic Initiative (CCEI); to build our own science, engineering, medical and educational systems and programs; to build our own science, engineering, medical and educational systems and programs; to build our own science, engineering, medical and educational systems and programs.

But why is the A.I.M. So integral to this process? Komrade George:

"The new vanguard elements seem to agree that withdrawal from the enemy state and its social, political and economic life is the first step toward its destruction. The new Revolutionary consciousness will develop in the struggles of withdrawal... They are the obvious answer to all the theoretical and practical questions and problems..."

Komrade George observed:

"Fascism has temporarily succeeded under the guise of reform. The only way we can destroy it is to refuse to compromise with the enemy state..."

The purpose of the Autonomous Infrastructure Mission is to forge our own food systems and proto-agricultural institutions through the Sustainable Agricultural Commune (SAC); to build our own jobs and businesses through the Closed-Circuit Economic Initiative (CCEI); to build our own science, engineering, medical and educational systems and programs.
with whom and what will we attack the fortified entrance of the productive and distributive system in a nation of short sighted, contented conservative workers? Obviously the fascist movement is counter revolution at its very center...From it’s inception the fascist arrangement has attempted create the illusion of a mass society in which the traditional capitalist ruling class would continue to play it’s leading role...After it’s successful establishment in Spain, Portugal, Greece, South Africa and the United States of America, we are faced with the obvious question of “how to raise a new consciousness.

We are faced with the task of raising a positive mobilization of Revolutionary consciousness in a mass that has “gone through” a contrapositive authoritarian process.”

I researched, devised and designed the AIM and it’s Initiatives while I was in solitary confinement. As I write this, I am in prison now.

Prison provides a unique perspective on social life and the mechanisms of civilization. Within this socially hostile microcosm lies an even more repressive, more extremely brutal environment: the indefinite solitary confinement unit, or SHU. It is, in effect, prison within prison, the most repressive environment in the U.S. fascist arrangement. From this unique socio-political perspective all of Amerikas’ contradictions are laid bare, from this point of view the fascist arrangement is as clear as a pane of glass.

Dialectically, the rational response to it is equally clear: RESISTANCE.

It was from this meager viewpoint that the Autonomous Infrastructure Mission was devised. The intention and motive force of the AIM was not simply to detach from the daily exploitation of the U.S. capitalist arrangement or provide a mere Community alternative to it’s processes. No. The purpose of the AIM is multifaceted, with one of its core functions to transform the minds
The People's attitudes are reflective of their conditions.

In order to positivelty influence an objectively negative social condition, one must introduce it's Opposite. The principles of unity and functional autonomy reflected in both the developmental processes of conduct, collective work & responsibility, self determination and restraint, the A.I.M.'s framework eradicates the influence of the fascist mass-psychology in the minds of the People. Let's examine this phenomenon.

In Blacks, the authoritarian traits are mainly the effects of terrorism and lack of intellectual stimulation. The communal experience will redeem them. A presciently attentive Black worker is a product of the communal experience and lack of intellectual stimulation. The command economy and lack of intellectual stimulation are mainy the effects of the command economy.

Komrade George observed, "Consciousness is... conscious stimulation pressure to bring forth a Revolutionary consciousness..."

To truly understand why withdrawal from the U.S. is necessary, we must examine some laws/legislation to control voter access of specific populations or voting methods, jerrymandering of voting districts and the manipulation of the media, intimidation through police harassment, manipulation of voting populations or voter legislation to control voter access of specific populations or voting methods.

The People's attitudes are reflective of their conditions. Psychology and socially speaking, they are impacted just as psychologically and socially speaking, they are impacted just as...
1) POWERFUL AND CONTINUING NATIONALISM
From the compulsory recitation of the pledge of allegiance in every U.S. public school to the “Make America Great Again” fervor of the white Nationalist Republican Party, powerful and reactionary nationalism has always been a hallmark of U.S. culture, and it only continues to grow stronger year over year with both the conservative right and liberal centrists alike.

2) DISDAIN FOR THE RECOGNITION OF HUMAN RIGHTS
Dehumanization of New Afrikans, Latinos, Indigenous and the poor is Amerikan as “Apple Pie.” From the genocide of Native Americans to the system of chattel slavery; from the brutality of Jim Crow apartheid to the rampant murder of unarmed New Afrikans by police; from the brutalization of prisoners of war at Abu Gharaib, Guantanamo Bay and CIA black sites around the world to presiding over the largest domestic torture program in human history in Solitary Confinement Supermax prisons across the U.S., disdain for human rights-and masking it under some other pretext- has always been U.S. National policy. To be sure, the U.S. remains one of the only industrialized nations who has NOT signed on to the U.N. Rights of the Child Treaty, presumably because of the Amerikan penchant to imprison children. Human rights are always secondary to National interests in Amerikan.

3) IDENTIFICATION OF ENEMIES/SCAPEGOATS AS A UNIFYING CAUSE
Be it the resistance of Indigenous People as a justification for wars of extermination, the fear of New Afrikan empowerment as a justification for COINTELPRO, the “War on Drugs” and Mass Incarceration, or the current scapegoating of immigrants, anti-fascists and Black protest movements as the source of all the Nations woes, the U.S. has ALWAYS used this racist, xenophobic and anti-poor narrative to whip masses of reactionaries into a patriotic frenzy to attack or socially contain perceived “common threats.”
4) SUPREMACY OF THE MILITARY

No matter the economic crisis, how dire and widespread inequality and domestic suffering may be, a disproportionate amount of the social product will always be funnelled to maintaining the Military Industrial Complex, and to ensure military service is revered and rewarded in every realm of social life, no matter the atrocities these forces may have committed in the nation's name. This has always been the 'American Way'.

5) RAMPANT SEXISM

Amerika is a patriarchal authoritarian hegemony of white male privilege. Be it overt inequality of pay in the private sector, rampant rape and sexual harassment in the military or pervasive domestic violence across every strata of U.S. society, sexism has always been a central pillar of the U.S. race-class system. Under U.S. fascism gender repression is embedded into the very notion of "Conservative Family Values", while publicly superficial "reforms" are highlighted to disguise it's perpetuation.

6) CONTROLLED MASS MEDIA

Because U.S. fascism is a Corporateocracy, "state controlled media" is more accurately termed "ruling class controlled media". This form of control ensures the media moves the state's agenda ever forward (which is the ruling class's agenda) via government regulation, censorship of opposing or alternative social perspectives and/or media executives and personalities sympathetic to law enforcement, censorship of oppositional or alternative social perspectives through the CPUSA or close ties with corporate management, with the most such unions are all too often lobbying wings of state institutions (like genuine labor unions are a party in this country, and where the state's interest or capitalist profit is threatened and co-opted to cooperate or resist oppositional organizing labor has been so Union busting and co-optation of organized labor has been so

7) OBSESSION WITH NATIONAL SECURITY

The United States is first and foremost a predatory capitalist/imperialist regime, it's every institution beholden to the business and corporate interests the state exists to protect. As Komrade George observed, "The most precise definitions of fascism involve the concept of "scientific capitalism" or "controlled capitalism"...". To be sure, the U.S. may be one of the only nations on Earth where "economic" is defined the same way across every political spectrum, market and state. The United States is first and foremost a predatory capitalist/imperialist.

8) RELIGION AND GOVERNMENT ARE INTERTWINED

Activists running campaigns contrary to the national population are often arrested and influence large whereas is the number one non-religious organization. Religion is fundamentally rooted in community for U.S. citizens, as the anti-evangelical and anti-public school forces have been so successful. Christianity and American politics are so intertwined that any campaign to change either has been so successful that the Religious Right has gained unprecedented influence.

9) CORPORATE POWER IS PROTECTED

has always been the American Way. In every realm of social life, no matter the economic crisis, the economic interests of the nation have always been the number one priority. This is why the government has been so successful in protecting the corporate interests of the nation. This is why the military is so powerful, and why the government has been so successful in protecting the corporate interests of the nation. This is why the military is so powerful, and why the government has been so successful in protecting the economic interests of the nation. This is why the military is so powerful, and why the government has been so successful in protecting the economic interests of the nation.
